PROFESSIONAL SUMMARY:

Experienced coder with a wide experience working in multiple coding languages who also has an intimate knowledge of client needs and customer service principles. A history of working with teams or on individual projects. Ability to type and enter data with accuracy and efficiency.

SKILLS:

- 2-years experience working with multiple languages including JavaScript, PHP, C#, Java HTML, CSS and SQL
- Proficient at building websites using a combination of HTML, CSS, JavaScript and PHP according to the needs of the client
- Worked on a group project in Visual Paradigm designing an application and database
- A self starter with the ability to work alone or as a team member
- Experienced with Microsoft Office products

RELEVANT SKILLS & EXPERIENCE:

Web programming skills

- Developed a client notification centre using PHP, HTML and SQL where managers could add clients and notifications and assign a notification to a client
- Completed a JavaScript project designed to test critical thinking by designing a series of functions

Application Development

- Created a mock flight booking program in a group environment using the C# language
- Built a program in Java to keep track of wins, losses and players for chess matches
- Constructed a mock book catalogue in Java which would allow one to add, view and delete books
- Developed a mock “scantron” program in C#

Other Relevant Experience

- Completed a film studies elective which taught how films were made including directing techniques and visual effects
- Constructed two gaming PCs from scratch as well as a “Hackintosh” Mac from an old PC
