To whom it may concern

Please accept my cover letter and CV as my application for the entry level position or internship with your company. I have always had a keen interest in coding, software development, web programming and database management and I am excited by the opportunity of starting my career on one of these paths within your company.

I have worked across multiple programming languages including JavaScript,Java, PHP, HTML, CSS, SQL, Python and C#. C# is the language I have had the most experience in, but I am very comfortable with the others, I am a self-starter and can ensure I can deliver projects "on point, on time and on budget" according to one of my recent employers.

Further details about my experiences and projects I have worked on can be found on my resume and I will happily provide references on request. I would welcome the chance to discuss any opportunity with you further or answer any questions you may have about my capabilities and experiences. Please feel free to contact me at 416-892-1604 or jenkynb@gmail.com.

Thank you again for the opportunity.
Sincerely,
Ben Jenkyn
